Prescription for Your Peace of Mind

Among the many worries of the Professional Man is the worry about what will happen if he becomes disabled by sickness or accident. Chances are his professional income stops; there's no boss to keep him on the payroll; no 30-day sick leave; no workmen's compensation. Financial disaster might face his family and himself.

Protection against that kind of disaster is the reason for Mutual of Omaha's PROFESSIONAL MEN'S PLAN of accident and health insurance. Protect yourself by enrolling now in this plan designed to meet the special problems of the Professional Man.

Full details without obligation. Address Professional Department, Mutual of Omaha.

FIFTY YEAR CLUB

The House of Delegates of the Medical Society of the State of North Carolina in May of 1953 authorized the Executive Council of the Society to establish a special recognition for those physicians residing in the State of North Carolina who were members currently of the State Medical Society, who had established legal practices of medicine and who had actively practiced medicine during their life time for a period of fifty years.

Listed below in alphabetical order are the names and address of those physicians residing in North Carolina, whom the Medical Society of the State of North Carolina has recognized as members of the FIFTY YEAR CLUB of the State Medical Society. This list will be added to from year to year and likewise subtracted from as losses to this club group are sustained and reckoned.

This listing for 1956 may include Fifty Year Club members, who have passed away since their recognition. The list will include only those members surviving during the year of the list and those added for that year.

RIGHT OR WRONG WAY

In collecting money, just as in most activities, there is a right and a wrong way to approach a patient, in order to collect a past-due obligation.

Over the years, and as a result of a multitude of experiences, we have developed the most efficient and psychologically effective collection methods possible for getting the money, while retaining good will.

We do it all, not only local accounts, but anywhere in the U. S. or Canada can be handled through our office. All the forwarding to various towns and cities is done for you, by us.

We leave you the time to practice your profession, while we collect the money, and maintain good relations between you and your patients.

Proven results over the past 30 years show that we can help you, just as we have helped hundreds of physicians with their ever present credit and collection problems.

⁵Hegsted, D. M. Further comments on cholesterol. Presented before American Medical Association, Los Angeles, December 1951.

FOODS of animal origin (milk, cheese, meat, eggs, etc.) combined with plant foods are needed for optimum nutrition.

About two-thirds of our protein comes from animal foods.¹ Most animal protein has a high biological value, by virtue of its content of essential amino acids. Animal foods are also a source of vitamin B₁₂, a factor necessary for red blood cell regeneration. There is evidence that the presence of animal protein foods in the diet favors normal lipid metabolism.²

Four-fifths of our calcium comes from animal foods, chiefly from dairy products. Without dairy foods it is exceedingly difficult to meet the requirements for calcium. Animal foods also supply three-fourths of our available riboflavin, one-half our niacin, and one-third of our thiamine.¹ These and other vitamins are necessary for normal cellular metabolism.

Animal foods contain cholesterol, a lipid which is a normal constituent of all body cells, and which is synthesized by the body from substances derived from protein, fats, and carbohydrates. Disturbed lipid metabolism may result in deposition of cholesterol with fatty acids and protein in the inner walls of the blood vessels. This condition, atherosclerosis, is a forerunner of a number of cardiovascular diseases.³

Atherosclerosis is frequently associated with obesity, diabetes, and other metabolic disorders.^{3,4} The cause of atherosclerosis has not been determined. Restriction of dietary cholesterol by elimination of animal foods has not been shown to be beneficial in its prevention or cure.⁴

The omission of the valuable nutrients found in these foods constitutes a nutritional risk not justified on the basis of currently available evidence.⁵
